

VPN Manual for Android 4.x/5.x

Installation

1. Install the OpenVPN Connect application, which can be found in [Google Play](#).

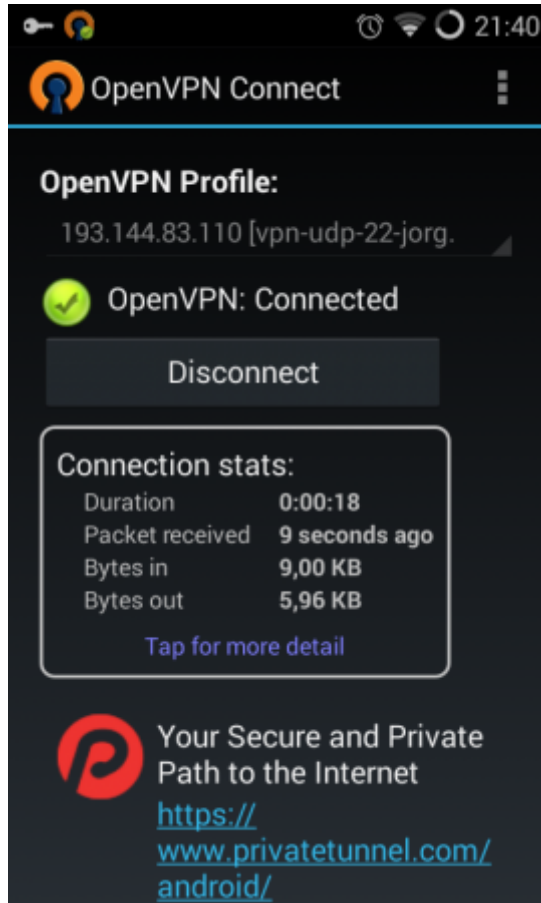

2. If you received the file `vpn-udp-22-user.name-config.ovpn` (not the one inside the zip file but the lone one on the outside) it is enough to send it to the device.
3. Else, if you don't have that file, send the full contents of the file `vpn-udp-22-nome.de.usuario-config.zip` to the device. You'll find three files with the following extensions: `p12`, `key` and `ovpn`. All of them must be stored in the same directory.
4. Launch the OpenVPN Connect application and choose `Import» Import profile from SD Card`. In the file explorer find and select the corresponding file with `ovpn` extension.
5. The application will try to find the certificate. You must choose the only option that should appear and press `Allow`.
6. Introduce your CiTIUS user and your password and then press `Connect`.

7. A warning will be shown about the VPN use and the possibility of having all your communications intercepted by the application which must be accepted.
8. Once done the application will connect automatically.

Connect and disconnect from the VPN

1. Open the Abre a aplicación OpenVPN Connect e pulsa no botón Conectar ou Desconectar. Pode que volvas a recibir a advertencia sobre a posibilidade de que a aplicación intercepte as comunicacións se reinicias ou apagas o dispositivo.
